

USER ROLES:

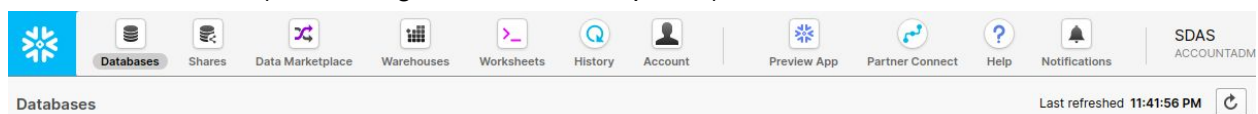

By default it is always SYSADMIN. If you change the role to some other role than SYSADMIN, when you login after logging out -> It remains SYSADMIN. Since its the default.

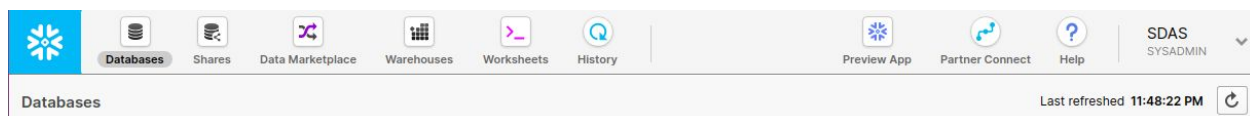

Roles: There are 5 roles

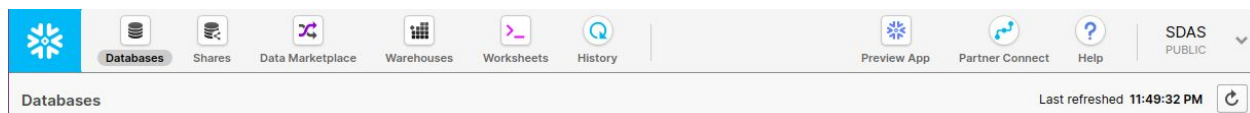

Understanding role settings is important since it is used to control options in the ribbon.
ACCOUNT ADMIN:(has the highest number of options)

SYSADMIN:

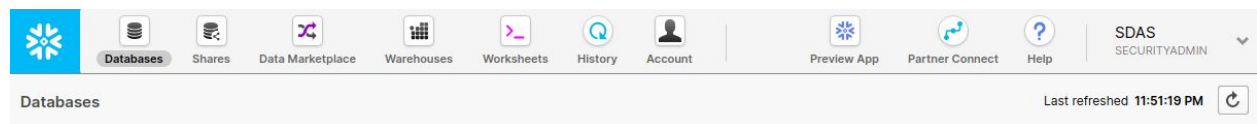

PUBLIC:

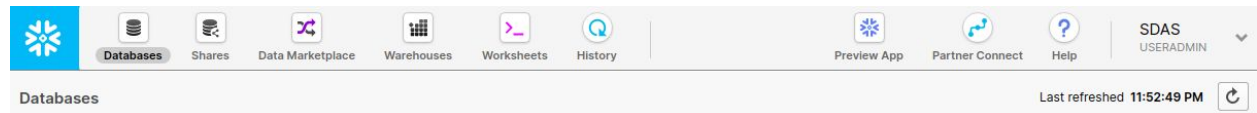

Note: SYS ADMIN and PUBLIC have the same number of options in the ribbon.

SECURITY ADMIN:

Note: Have account option but no notification

USER ADMIN(April 2020 addition):

Spring 2020 Addition : Data Marketplace and Preview Apps. Changes are already in Azure and AWS, but yet to happen in GCP
