

Target:

1. Using the Snowflake WebUI, create a warehouse.
2. Given a worksheet, use the context menu to set the warehouse context of that worksheet so that it uses a specified warehouse for processing.
3. Use a SQL script to set the warehouse listed in the context menu of a worksheet.
4. Turn on the Code Highlight feature and use it in conjunction with the All Queries check box to run single statements or entire worksheets of statements as needed.

Warehouses > COMPUTE\_WH

Last refreshed 3:23:27 PM

Notice the functions available for warehouses along the highlighted menu area. Click the numbered dots to explore each of the functions in depth.

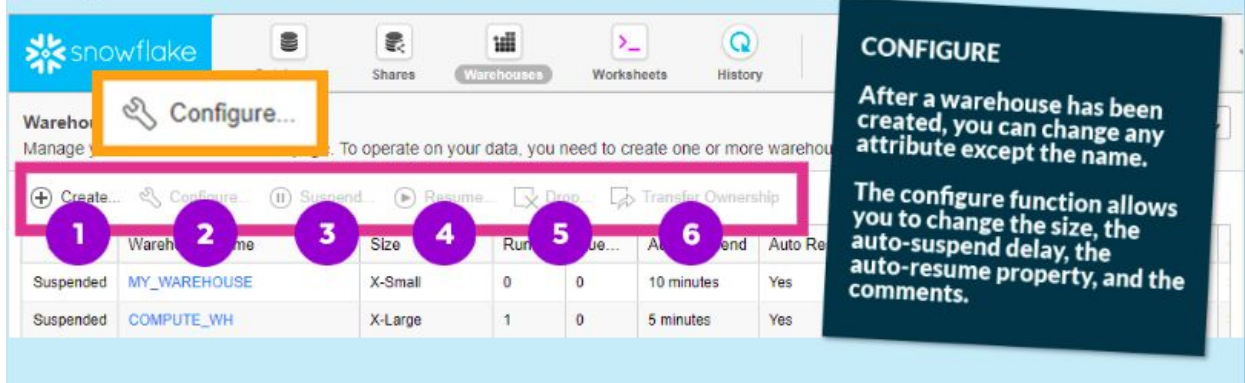

**CREATE**

Use the create button to make a new warehouse. An account can have many warehouses with no impact on costs.

The only costs accrued by warehouses are based on their time running. While warehouses are suspended they accrue no costs.

	Warehouse Name	Size	Running	Queue...	Auto Suspend	Auto Resume
Suspended	MY_WAREHOUSE	X-Small	0	0	10 minutes	Yes
Suspended	COMPUTE_WH	X-Large	1	0	5 minutes	Yes

Notice the functions available for warehouses along the highlighted menu area. Click the numbered dots to explore each of the functions in depth.

**CONFIGURE**

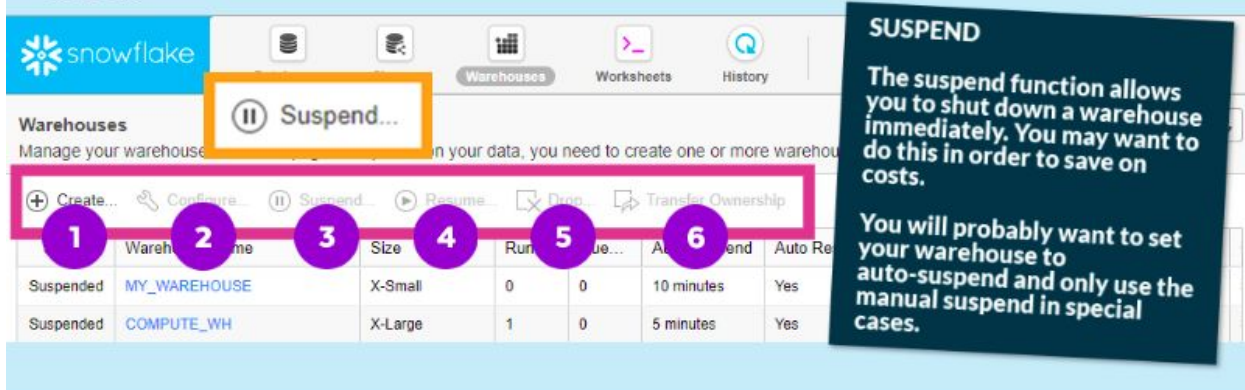

After a warehouse has been created, you can change any attribute except the name.

The configure function allows you to change the size, the auto-suspend delay, the auto-resume property, and the comments.

	Warehouse Name	Size	Running	Queue...	Auto Suspend	Auto Resume
Suspended	MY_WAREHOUSE	X-Small	0	0	10 minutes	Yes
Suspended	COMPUTE_WH	X-Large	1	0	5 minutes	Yes

#### Lesson 4- Part B: E-Learning

Notice the functions available for warehouses along the highlighted menu area. Click the numbered dots to explore each of the functions in depth.

**SUSPEND**

The suspend function allows you to shut down a warehouse immediately. You may want to do this in order to save on costs.

You will probably want to set your warehouse to auto-suspend and only use the manual suspend in special cases.

	Warehouse Name	Size	Running	Queue...	Auto Suspend	Auto Resume
Suspended	MY_WAREHOUSE	X-Small	0	0	10 minutes	Yes
Suspended	COMPUTE_WH	X-Large	1	0	5 minutes	Yes

Notice the functions available for warehouses along the highlighted menu area. Click the numbered dots to explore each of the functions in depth.

Warehouses

Manage your warehouses from this page. You need to create one or more warehouses before you can use them.

	Warehouse Name	Size	Running	Queued	Auto Resume	Auto Suspend
Suspended	MY_WAREHOUSE	X-Small	0	0	10 minutes	Yes
Suspended	COMPUTE_WH	X-Large	1	0	5 minutes	Yes

### RESUME

Resume will start a suspended warehouse. If the warehouse is configured to auto-resume, you will not be required to use this link, though you can.

You can also resume a warehouse manually from within the context drop menu in the worksheets area.

Notice the functions available for warehouses along the highlighted menu area. Click the numbered dots to explore each of the functions in depth.

Warehouses

Manage your warehouses from this page. To operate on your data, you need to create one or more warehouses.

	Warehouse Name	Size	Running	Queued	Auto Resume	Auto Suspend
Suspended	MY_WAREHOUSE	X-Small	0	0	10 minutes	Yes
Suspended	COMPUTE_WH	X-Large	1	0	5 minutes	Yes

### DROP

Dropping a warehouse is the same thing as deleting it.

Dropped warehouses cannot be recovered. Dropping a warehouse while a query is running will end all work on the query in progress.

Notice the functions available for warehouses along the highlighted menu area. Click the numbered dots to explore each of the functions in depth.

Warehouses

Manage your warehouses from this page. To operate on your data, you need to create one or more warehouses.

	Warehouse Name	Size	Running	Queued	Auto Resume	Auto Suspend
Suspended	MY_WAREHOUSE	X-Small	0	0	10 minutes	Yes
Suspended	COMPUTE_WH	X-Large	1	0	5 minutes	Yes

### TRANSFER OWNERSHIP

Warehouses are owned by roles, not individual users.

For example, this option could be used to transfer a warehouse owned by the SYSADMIN role to new ownership by the ACCOUNT ADMIN role.

The configuration of a warehouse can be changed at any time.

The warehouse name is the only attribute that cannot be changed after the initial creation.

Size	Run...	Que...	Auto Suspend	Auto Resume	Created C
X-Small	0	0	10 minutes	Yes	1/16/19 6
X-Large

## Essentials Lab 4

### Exercise 5

- 1) To set a worksheet's context using code, type the **USE WAREHOUSE** statements (shown) into the **SQL Pane**.
- 2) Click the [...] button to the right of the **[Context]** menu.
- 3) Select **[Turn on Code Highlight]**.
- 4) Click any text in the **SQL Pane**.  
  
The background of the statement you click turns blue, while others do not.
- 5) Click **[Run]** to run the currently highlighted SQL statement.
